

You may think that food is just breakfast, lunch or dinner.....

**THINK AGAIN!!!**

# The Science of Food

With food science, you can explore chemistry with **COLOR CHANGING** gummy bears, or dissolve eggshells with acid. We can make instant crystals, or break up chocolate into sawdust.

Is it possible to bend light or make food invisible? Turn a simple carrot into an underwater diver, or make POP Rocks jump like popcorn or shoot marshmallows out of a bottle?

If this sounds like fun, please join us for this exciting after school class.

Thursdays, from 3:40-4:40

October 11, 18 & 25

November 1, 8, 15 & 29

December 6 & 13

\$180
